## EXPERIENCES

Asst. Developer | Code for Change (CFC) Pokhara

12 2020 - 03 2021 Pokhara, Nepal

- Built the website and mobile application for Team Codera and CFC.
- Walked through various leadership programs conducted by CFC Pokhara.

React, Node, Firebase, Typescript, React Native, Git

Vice Chairman | PU Developers Community

02 2022 - Present Pokhara, Nepal

- We formed a Developer Community in our university known as PU Developers Community. Its approach is to bring students of PU with the same interests together and make the learning path easier. Me along with my team conducted 3 coding boot-camps(including Git and GitHub, Basic React, MongoDB). We formed different developer groups like Web, Open Source, Ethical Hacking, etc. I took the lead on Web Development.

Git, GitHub, Teamwork, Leadership

## PROJECTS

Cocktails Website | GitHub | Globe

React, Auth0, Tailwind CSS

2022

- This website built with React and ContextAPI allows users to search for cocktails and get detailed information about a specific cocktail.

Github User Finder | GitHub | Globe

React, Auth0, Tailwind CSS

2022

- This website built with React and Context API allows users to search for any github user and get detailed information about a specific github user. I used the fusion charts library to show the data related to languages the user used in his repos, stars, most popular and most forked repos. Auth0 is used for handling authentication.

Dojo Online Store | GitHub | Globe

React, Auth0, Tailwind CSS

2022

- This website is built with React( combination of Context API and reducers) which allows users to view and search for their desired products. Integrated with Auth0 for handling authentication. I used Stripe's test integration method for testing payments.

Jobster (Job Tracking Website) | GitHub | Globe

React, Auth0, Tailwind CSS

2022

- This website is built with React, React-Redux and Redux-Toolkit which allows users to create, view details, update/edit and delete the jobs and stay updated about the jobs.
